GitHub: <https://github.com/lumidee007> | Portfolio: <https://femiayinla.com/>

PROFILE

Full-Stack Developer with hands-on experience building responsive, dynamic web applications using modern web technologies. Strong foundation in both frontend and backend development with a proactive learning mindset and a background in data analytics. Capable of turning business requirements into practical, scalable solutions. Passionate about clean code, performance, and solving real-world problems.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6), Java, Python, PHP

Frameworks & Libraries: React, Redux, Node.js, jQuery

Databases: MySQL, PostgreSQL, SQL

Tools & Platforms: Git, GitHub, Webpack, Command Line, RESTful APIs

Concepts: Responsive Design, CRUD operations, Agile methodology, Software Development Lifecycle (SDLC)

PROJECT HIGHLIGHTS

WorldWide App

Live App: <https://react-worldwise-tzde.onrender.com>

GitHub: [worldwise repo](#)

Description: Built a React application that allows users to track and manage visited cities using geolocation and interactive maps. Features include reverse geocoding, protected routes, and context-based state management.

Technologies: React, JavaScript, CSS Modules, React Context API, Custom Hooks

Ravenous – Yelp Business Search App

Live App:

GitHub: [ravenous repo](#)

Description: Developed a React-based application that allows users to search for local businesses by name and location using the Yelp API. Displays real-time listings with ratings, reviews, and images to support decision-making.

Technologies: React, REST APIs (Yelp)

Company Directory App

Live App: <https://femiayinla.com/companydirectory>

Github: [company-directory repo](#)

Description: Built a responsive web app to organize and display employee contact information, including names, job titles, departments, emails, and office locations. Designed for easy navigation and efficient data management.

Technologies: HTML, CSS, JavaScript, Bootstrap, PHP, SQL

Gazetteer Web App

Live App: <https://femiayinla.com/gazetteer>

Github: [Gazetteer repo](#)

Description: An interactive web app for exploring country data worldwide using map clicks and user location. Connects to multiple APIs to fetch and display real-time country-specific information.

Technologies: HTML, CSS, JS, jQuery

Jammming Spotify App

Live App: <https://jammming-react-playlist.netlify.app>

Github: [jammming repo](#)

Description: Developed a React-based music application that lets users search for songs via the Spotify API, create custom playlists, and save them directly to their Spotify account using OAuth authentication.

Tech Stack: HTML, CSS, JavaScript, React

API Used: Spotify Web API

Travel Planner App

Live App: <https://femi-travel-planner.netlify.app/>

Github: [Travel-planner. repo](#)

Description: Built a web-based travel planner that enables users to input a city and travel date to receive weather forecasts and destination images. The app integrates external APIs to enhance trip planning with real-time or future weather data and location visuals.

Tech Stack: HTML, CSS, JavaScript, Node.js, Express

APIs Used: Weatherbit API, Pixabay API

Movie Search App

Live App: <https://lumidee007.github.io/react-movie-app/>

Github: [Movie-Search repo](#)

Description: Developed a responsive React application that allows users to search for movies and view details like title, release date, rating, and description using the OMDb API.

Tech Stack: HTML, CSS, JavaScript, React
